                                                                                                                                                                                                                                                                                                                          A. Melacule (1978) DMA Motion to type: DMA Motion that Motion that Motion that Motion that Motion that Motion that Sequence has been extensively revised in reference JS0520 C. Genetics: 1.731 Genetics: A. Complex: homotetramer; two non-covalently associated iron protoheme IX groups per tetra C. Function: AATS Primerical Complex: Proserriction: AATS Carboarchicion as catalase, catalyzes the dismutation of two molecules of hydrogen perox C. Function: ARSS
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     A Description: as perovidase, uses hydrogen peroxide to oxidize donor compounds production as peroxidates, uses hydrogen peroxide to oxidize donor compounds, including larger ones which confidence active which a broad spectrum of donor compounds, including larger ones which confidence the chromoprories home: homotetramen; incom metalloprotein; oxidoreductase P:104/product oxide this (distant manal ingamul) storum specificate the confidence of the confidence or product 
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     267
